Confidence and extreme comfort

With increased core strength, rigidity and extreme flexibility, support plus offers a lighter more stable shoe that lets you walk with total confidence.

The Homy Ped support plus system provides superior support with unequalled comfort for a heeled shoe. The anatomically designed footbed provides superb cushioning under foot and is not only functional but also vitally important in minimizing the incidents of foot ailments caused by non supportive cumbersome shoes.

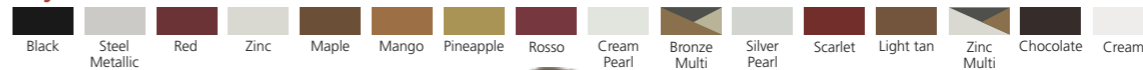

supportplus

All these 'City' styles have the new support plus innovation

Support Plus - the most comfortable heeled shoe ever.
